## Communicable diseases reportable by NDR or other form

## Reference list for MOHs and designates

Diseases in red are reportable by fastest means possible (FMP) from MOH to CMOH

Acute Flaccid Paralysis

Acute Hepatitis of Unknown Etiology in Children

Amoebiasis

**Anthrax** 

Arboviral Infections - including:

Chikungunya Virus

Dengue Fever

Eastern Equine Encephalitis

Flavivirus (Other)

Jamestown Canyon Virus

Japanese Encephalitis

Powassan Encephalitis

Snowshoe Hare Virus

St. Louis Encephalitis

West Nile Virus

Western Equine Encephalitis

Yellow Fever

Zika Virus

**Botulism** 

Brucellosis

Campylobacteriosis

Carbapenemase Producing Organisms

Chancroid

Chlamydia (includes perinatally acquired)

Cholera (O1, O139)

Coronavirus, COVID-19

Coronavirus, MERS/SARS

Coronavirus, Novel

Creutzfeldt-Jakob disease, Classic & Variant

Cryptosporidiosis

Cyclosporiasis

Cytomegalovirus, Congenital

Diphtheria

Disease in Unusual Form

Enterovirus D68

Escherichia coli (Verotoxigenic)

Giardiasis

Gonorrhea (includes perinatally acquired)

Haemolytic Uremic Syndrome

Haemophilus influenzae - non-serotype b, Invasive

Haemophilus influenzae - serotype b, Invasive

Hantavirus

Herpes Simplex, Neonatal

Hepatitis, Acute/Severe of Unknown Origin in Children

Hepatitis A

Hepatitis B, Acute & Chronic

Hepatitis C, Acute & Chronic

Hepatitis E

Histoplasmosis

Human Immunodeficiency Virus

Influenza, Avian; Influenza, Novel

Influenza, Seasonal

Legionellosis

Leprosy

Listeriosis

Lyme Disease

Lymphogranuloma Venereum

Malaria

Measles

Meningococcal Disease, Invasive

**MPOX** 

Muco-Purulent Cervicitis

Multisystem Inflammatory Syndrome in Children and

Adolescents

Mumps

Non-Gonococcal Urethritis

Paratyphoid Fever

Pertussis

Plague

Pneumococcal Disease, Invasive

Poliomyelitis

**Psittacosis** 

Q Fever

Rabies

Rare or Emerging Communicable Disease

Rickettsial Infection

Rubella (includes Congenital Infection / Syndrome)

Salmonellosis

Severe Respiratory Illness

Shellfish Poisoning

Shigellosis

Smallpox

Streptococcal Disease - Group A, Invasive

Syphilis (includes Congenital)

Subacute Sclerosing Panencephalitis

Tetanus

Trichinosis

Toxoplasmosis, Congenital

Tuberculosis

Tularemia

Typhoid Fever

Varicella (Chickenpox), Hospitalized or Congenital/Neonatal

Vibrio cholerae (non-O1, non-O139)

Vibrio parahaemolyticus

Viral Hemorrhagic Fevers

Argentine Haemorrhagic Fever

Crimean Congo Haemorrhagic Fever

Ebola Haemorrhagic Fever

Lassa Fever

Marburg Haemorrhagic Fever

Rift Valley Viral Haemorrhagic Fever

Yersiniosis

Outbreaks / epidemics of any communicable disease are reportable to the Chief Medical Officer of Health.
